Subject: Agenda for Interview on February 17th @11:00 AM Eastern in Appln No. 10/584,780

Examiner Han,

Thank you for taking the time on Friday to talk to me about the above application.

I would like to discuss withdrawal of the outstanding restriction in view of the amendments that we proposed in our last response. Although I realize that the amendments were not entered, I would like to know whether, if entered, the restriction would be withdrawn.

Regarding the prior art, I would like to discuss the applied Nonobe reference. As we understand it, the cited portions of Nonobe describe conditions for determining whether there is proper humidification in a fuel cell. By contrast, the claims are directed to determining a calibration function and to delivering water flow at a rate determined by the calibration function.

I look forward to talking to you.

Best regards,

Paul A. Pysher
